### OVERVIEW

### CONTENTS

## About this book

Game culture and material culture have always been closely linked. Analog forms of rule-based play (ludus) would hardly be conceivable without dice, cards, and game boards. In the act of free play (paidia), children as well as adults transform simple objects into multifaceted toys in an almost magical way. Even digital play is suffused with material culture: Games are not only mediated by technical interfaces, which we access via hardware and tangible peripherals. They are also subject to material hybridization, paratextual framing, and processes of de-, and re-materialization.

The contributors examine this playful materiality from various angles.

## Author information

Benjamin Beil is a professor for media studies and digital culture at the Department of Media Culture and Theater at Universität zu Köln.

Gundolf S. Freyermuth is a writer, media producer and co-founder of the Cologne Game Lab (in 2010, together with Prof. Björn Bartholdy).

Hanns Christian Schmidt works as a research assistant at the Institute of Media Culture and Theater at Universität zu Köln.

# Education market with the Chinese characteristics: The rise of *minban* and transnational higher education in China

Ka Ho Mok 

Institute of Policy Studies, Lingnan University, Hong Kong, China

## Abstract

In the last few decades, the Chinese higher education system has changed considerably from an elitist model to a massified one with public and *minban*/transnational provisions. Accordingly, this study sets out against the context of higher education expansion initiated in late 1998 to critically examine the major trends of non-state (including *minban* and transnational) higher education developments. More specifically, it discusses how *minban* higher education has transformed and why transnational higher education has evolved and become far more popular in China. Against the marketisation and privatisation of education context, this article focuses on reviewing policy change and university governance to diversify higher education provision through the market forces/non-state provision. A critical examination of the changing state-market-education relationship would enable us to appreciate the complex social, economic and political issues that the Chinese government has to tackle, especially when the country confronts the dilemma of adopting a more liberal approach in reform with the fear of excessive external influences to the political regime or a more conservative approach which would limit the country's further development. The present article contributes to a better understanding of the 'education market' formation in China.

## KEYWORDS

education market, internationalisation, *minban* higher education, privatisation of higher education, transnational higher education

MOK

Higher Education Quarterly—WILEY | 399

## 抽象的

在过去的几十年中，中国的高等教育体系已从精英主义模式转变为兼具公办、民办和跨国教育的大众化模式。本研究以1998年末开始的高等教育扩张为背景，批判性地考察了非国有（包括民办和跨国）高等教育发展的主要趋势。本文讨论了民办高等教育是如何转变的，以及跨国高等教育如何在中国发展并变得越来越受欢迎。在教育市场化和私有化的背景下，本文着重研究政策和大学管理是如何通过市场力量来促进高等教育提供多样化。通过研究不断变化的国家-市场-教育关系，本文分析了中国政府必须解决的复杂的社会、经济和政治问题，既试图采取市场措施来改革及推动高等教育的发展；但当前面临外部改革潮流对本国发展呈过度影响之际，重新采取比较保守的教育发展措施。本文有助于更好地了解中国“教育市场”的形成及国家、高等教育和教育市场的關係。

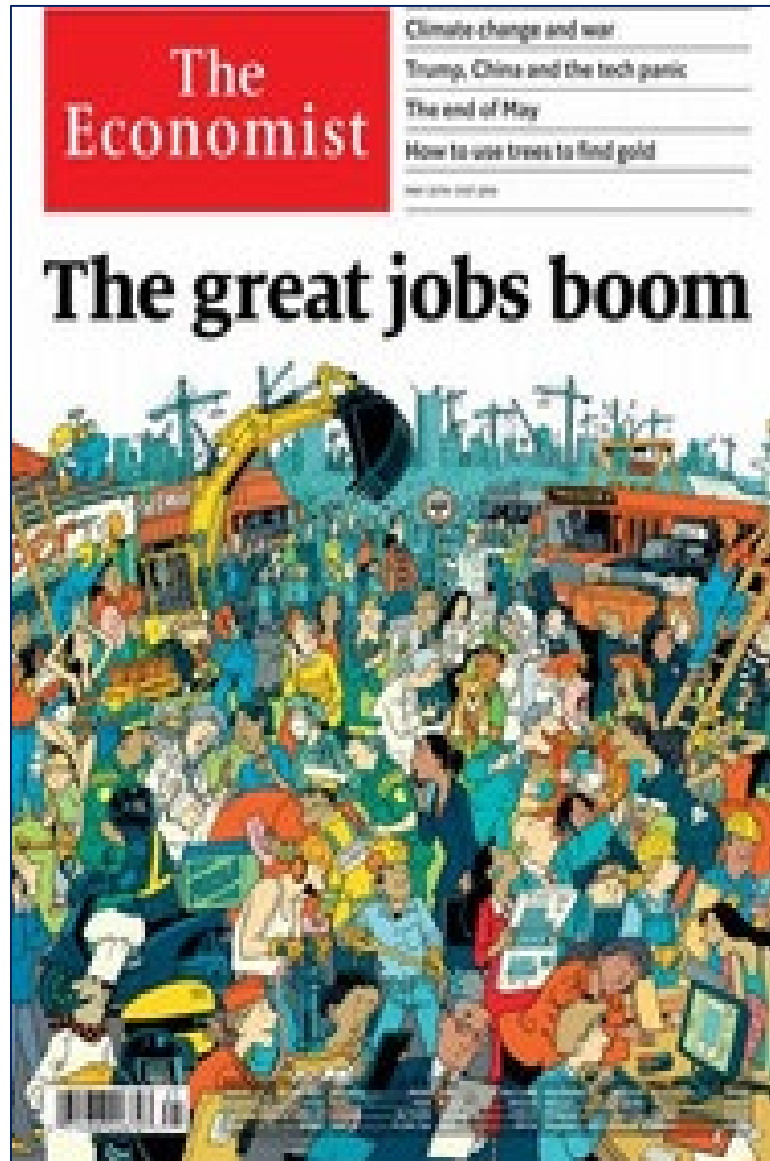

## 1 | INTRODUCTION

Since the reform and opening up in 1978, the Chinese government under the leadership of Deng Xiaoping soon found the obsolescence of the higher education system in the Post-Cultural Revolution to meet the rapid development needs. Whilst its economy developed from a highly centralised planned economy to a socialist market economy, the Chinese leaders began to facilitate transformations not only in public higher education but also in *minban* (people-run) colleges/transnational higher education to meet the pressing learning demands of Chinese citizens. In the last few decades, the Chinese higher education system has changed considerably from an elitist model to a massified one with public and *minban*/transnational provisions (Gao, 2018; Mok & Han, 2016; Zhang & Wang, 2018). Accordingly, this study sets out against the context of higher education expansion initiated in late 1998 to critically examine the major trends of non-state (including *minban* and transnational) higher education developments. More specifically, it discusses how *minban* higher education has transformed and why transnational higher education has evolved and become far more popular in China. Against the marketisation and privatisation of education context, this article focuses on reviewing policy change and university governance to diversify higher education provision through the market forces/non-state provision. A critical examination of the changing state-market-education relationship would enable us to appreciate the complex social, economic and political issues that the Chinese government has to tackle, especially when the country confronts the dilemma of adopting a more liberal approach in reform with the fear of excessive external influences to the political regime or a more conservative approach which would limit the country's further development.<sup>1</sup>

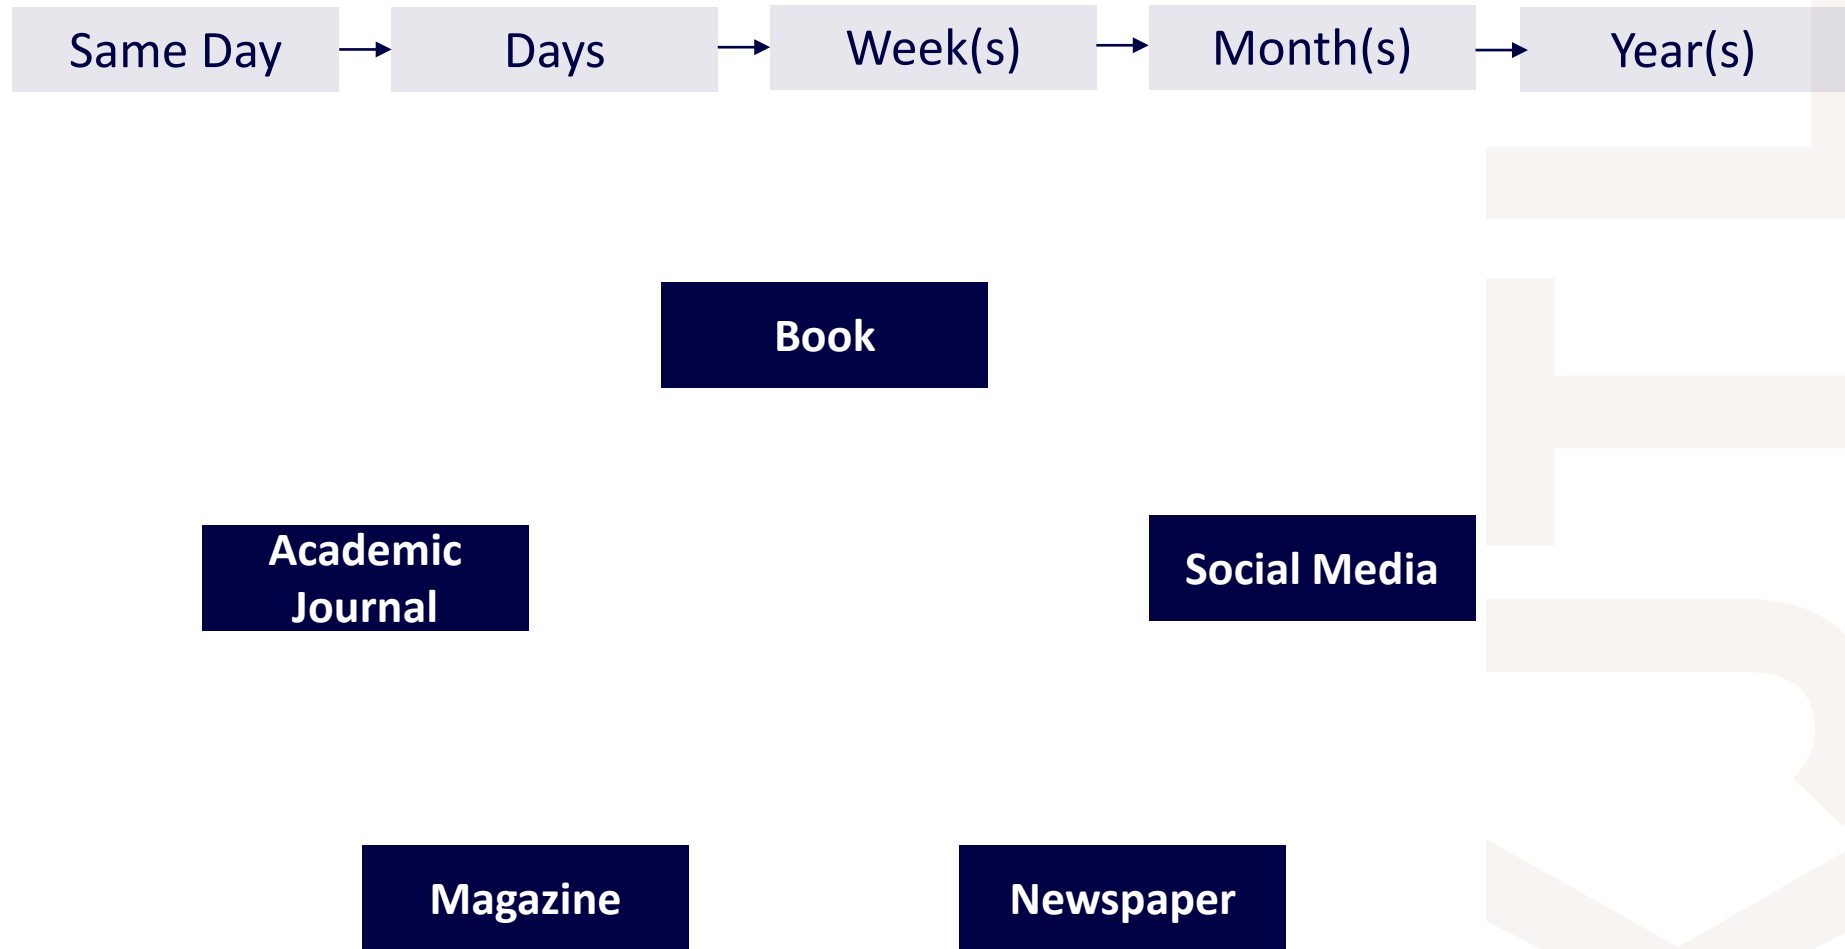

## 2 | HIGHER EDUCATION EXPANSION: HISTORICAL AND POLICY REVIEW

China's Higher education rapid expansion has been particularly noted in the last two decades, transformed from an elite system with around 5% of the Chinese citizens' ages 18–20 enrolling in tertiary education in late 1990 to a mass system with over 48% of the same age cohort in 2016. Meanwhile, China has annually produced 8 million university graduates in the last ten years, globally evolving into one of the largest HE systems (Rhoads

## 2.1 Library Platforms

The Library homepage (<https://lib.xjtlu.edu.cn/>), a gateway to e-resources and a manual to Library services, is available 24/7 all year around.

## 2.2 Library Full-Text Databases

**Full-text resources** normally refer to publications with the form of text that the entire article of which can be read and downloaded immediately. They include e-books, journal articles, newspaper articles, dissertations and theses, and more. **Full-text databases** provide the entire text of the journal articles, e-books, reports, etc.

### Databases A-Z

ABI/INFORM Complete features thousands of full-text journals, Economist, country-and industry-focused reports, and download business trends around the world. [more...](#)

**New / Trial Databases**

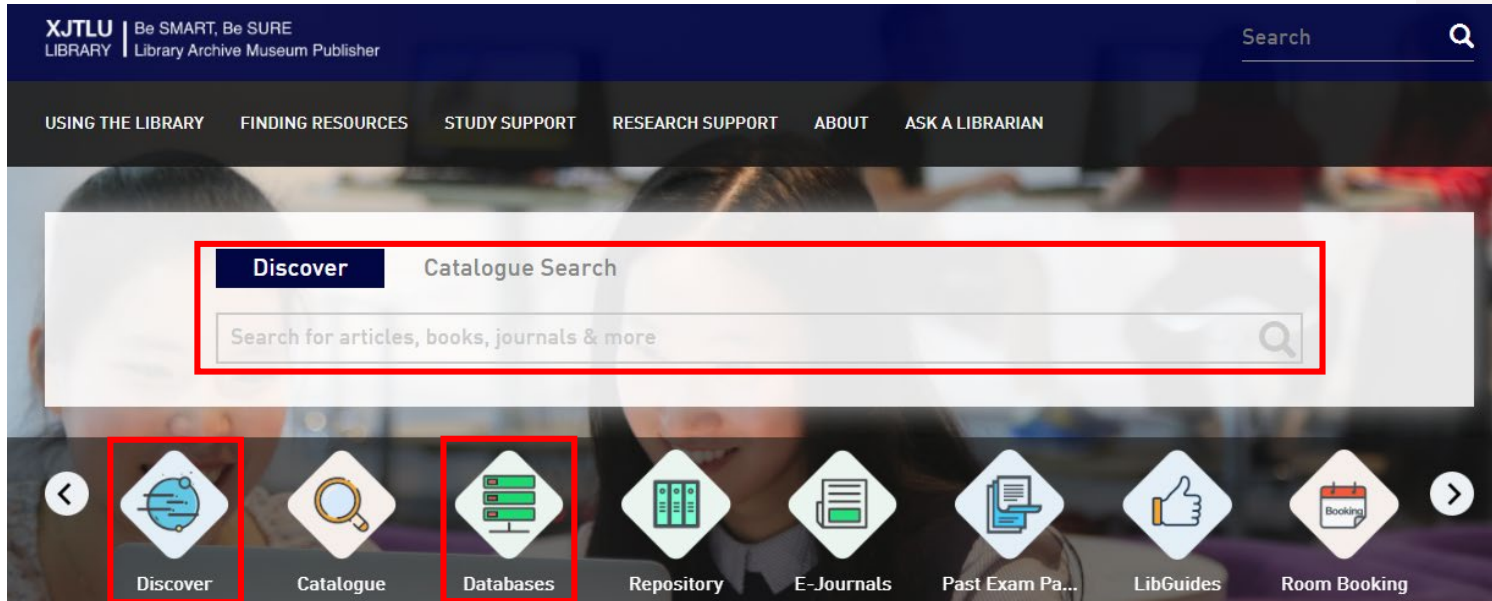

The following databases are newly acquired or being evaluated for a future subscription.

**fDi Markets**

NOTE: Please click the PDF file icon to download the attached file on how to access fDi Markets database.

fDi Markets is the most comprehensive online database of crossborder greenfield investments available, covering all countries and sectors worldwide. It provide access to real-time monitoring of investment projects, capital investment and job creation. You can also track and profile companies investing overseas, as well as conduct in-depth analysis to uncover trends.

## 2.2 Library Full-Text Databases

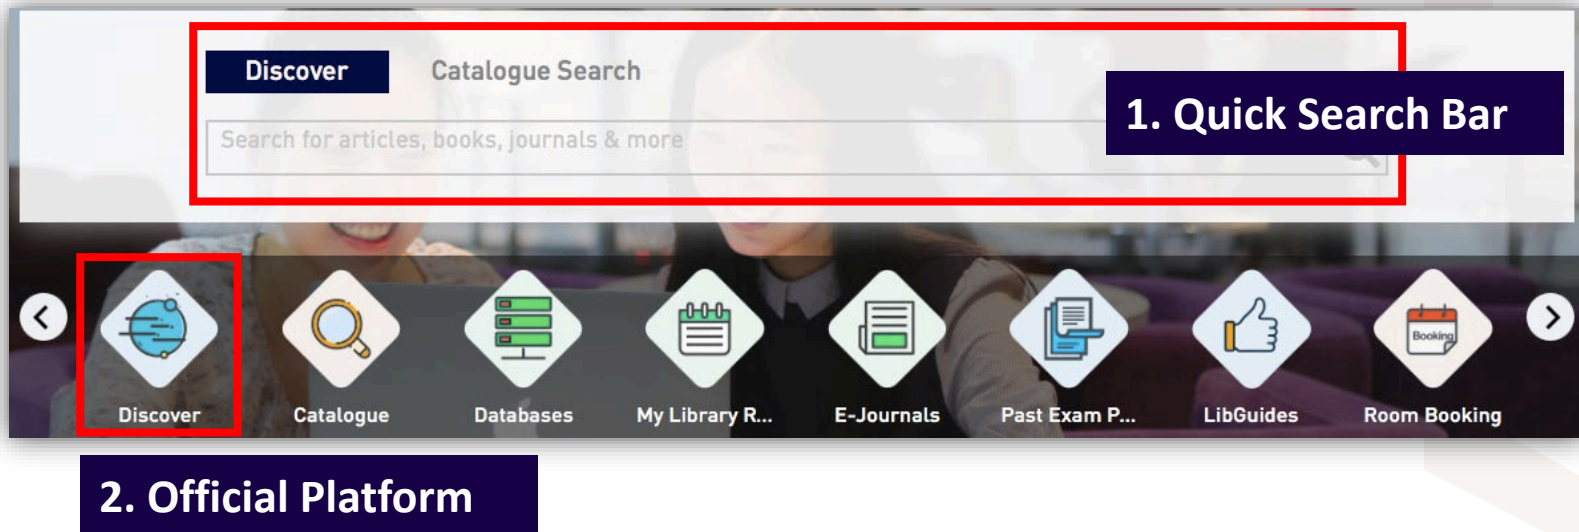

A full-text database is recommended when you only need full-text resources and **you know which database to use**.

However, if you just need full-text resources, but have no idea on which database to use, you can start with ***Discover***.

## 2.3 Discover

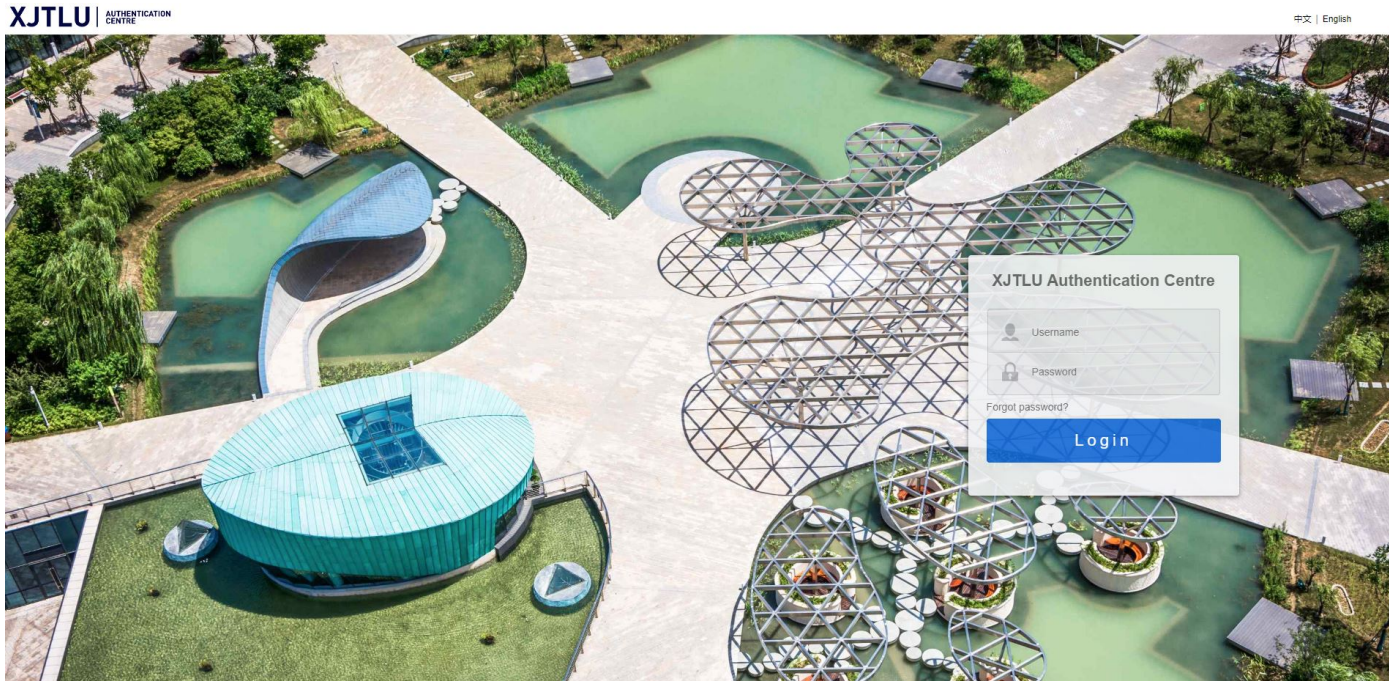

In XJTLU, resources contained in most full-text databases are centralized in Discover. In general, Discover can be regarded as a collection of full-text databases, or a larger full-text database that contains a lot of small full-text databases.

# If you are not on campus...

## Off-campus access:

Please be noted that the "Username" should be the prefix of your XJTLU email. For example, input "tom.green2202" instead of "tom.green2202@student.xjtlu.edu.cn" as the username.

Find out more at <https://libguides.lib.xjtlu.edu.cn/off-campus> .
